

Notice To Shareholders - IPO Listing Postponed

April 6, 2020 - Vancouver, BC - Blanco Minerals Inc., the lithium mining company with ongoing projects in Chile, Argentina and Mexico, today announces to our valued shareholders that we have indefinitely postponed our previously announced initial public offering listing that was scheduled to take place on April 7, 2020.

The Board of Directors, Management and Underwriting Sponsors for the IPO listing elected to postpone the listing as a result of unfavorable market conditions due to the COVID-19 crisis. Blanco Minerals will continue to evaluate the timing for the IPO listing as the disease epidemic unfolds. The company intends for the IPO to list at the earliest time when market conditions prevail in order to achieve the highly profitable outcome that all parties involved believed would have occurred under normal circumstances.

" Due to the uncertainty and current weakness in the public markets caused by the coronavirus, we have made the difficult decision that now is not the right time for Blanco Minerals to move forward with the IPO listing," stated Peter Ross, CEO of Blanco Minerals Inc. " We remain a very healthy company with a strong growth strategy and have valuable financial backing from our investors and corporate partners," added Mr. Ross.

Mr. Ross also remarked, "to make things clear to our shareholders, Blanco Minerals will fulfill the strategy of going public as soon as conditions are favourable, we have made the decision of a postponement as a means to protect the investment of all our shareholders. Currently, it is too risky to go public and expose our investors to the market uncertainties. We cannot give a timeframe for a new listing date right at this moment, it is a wait and see situation but we intend to fulfill the promise of an IPO listing as soon as it is feasible."

Blanco Minerals Inc. will continue to provide all shareholders with information regarding the developments and advancements relating to our ongoing lithium mining projects. As in the past, Blanco Minerals will continue to have the company audited and revalued on a regular basis and our shareholders will be informed of the results of each new financial valuation.
